

As a citizen of Indiana I want to speak out against 02-278. Our do not call law is the best piece of legislation to be passed in some time. I would be very dissatisfied if the federal government gives a preemption to these banks. I believe phones are private and not open to the same laws that govern public access. I know other people feel this way. We have even changed our vote to back the legislators that support this law. We felt strongly enough to change votes against those who would support the invasion of privacy this change would represent.
